Subject: ATTACHED: Claude AI chat, funder pitch and tech for ITEGA/Newshare/Missouri
To: Don Marti <[redacted]>, Rick Lerner <[redacted]>

Don / Rick,

Attached are the three documents I mentioned in my phone call to each of you earlier. The second two were generated by Claude AI after I uploaded to the AI bot and it digested about a half dozen key ITEGA governance, design and technical documents prepared in December and January.

THE ATTACHMENTS:

1. Transcript of my Feb. 22-23 "dialog" with Anthropic's Claude Sonnet 4.6
Underlining added for emphasis, otherwise unedited.
2. Funding request: "The Newshare Network: Federated Identity, Single Sign-On and Fair Payment for Independent Journalism" (100% written by Claude-unedited)
3. Newshare Network / Technical Architecture and Specification (100% written by Claude-united)

I would like you to think of these documents as akin to work of an academic scholar inviting you to provide peer review. Because I am not a technologist I'm particular intrested in your assessment of the specific applications Claude recommends in the sections below are appropriate. Also of particular interest:

1. Are the assertions of marketplace status Claude makes in the chat and documents reasonable? Do they build a case for ITEGA?
2. Are the protocol selections recommended by Claude on Page 7 of the tech spec appropriate and a state-of-the-art updating of the 1996 proof of concept?
3. Evaluate or provide impressions of the Recommended Technology Stack described from Page 12 of the tech spec as to purpose fit or other matters.

4. Comment on Deployment Architecture for Project at the bottom of Page 12 of the tech spec.
5. If you have knowledge, is the Missouri Pilot description of user experience from Page 16 consistent with the expectations of partners PubGen.AI, RJI and the Missouri Press Association?
- 6.
7. Is the competitive analysis at Page 19 adequate/accurate.

Thank-you for your help. The continuation of ITEGA depends on funding and technical expertise and knowledge along with governance. It's time to see what's possible now, and by who.

-- bill
